SUMMARY

Computer Science undergraduate at VIT Bhopal with a strong foundation in Python, SQL, Excel, Power BI, Tableau, and data analysis. Skilled in data cleaning, exploratory data analysis, visualization, and deriving actionable insights from datasets. Hands-on experience working with Python libraries such as Pandas, NumPy, and Matplotlib, along with a growing understanding of business-oriented analytics and data-driven problem solving.

EDUCATION

Vit Bhopal University

Bachelor of Technology in Computer Science, Gaming Technology, CGPA: 8.11

Bhopal, Madhya Pradesh

2023 – 2027

TECHNICAL SKILLS

Languages: Python, SQL, DAX

Frameworks: Pandas, NumPy, Matplotlib, Seaborn

Tools: Excel, Power BI, Tableau, Jupyter Notebook

Databases: MySQL

PROJECTS

Bank Loan Analysis Dashboard | *SQL Server, Tableau, Excel*

- Analyzed 38,000+ loan records in SQL Server to compute core lending KPIs (funded amount, amount received, interest rate, DTI) and built MTD/MOM queries to track monthly trends
- Classified loans as Good (Fully Paid/Current) or Bad (Charged Off) using SQL, quantifying default rate and its impact on funded vs. received amounts
- Built a 3-page Tableau dashboard (Summary, Overview, Details) to visualize loan performance by state, term, purpose, and borrower profile for faster risk identification

BigBasket Grocery Sales Dashboard | *Power BI, DAX, Excel*

- Built an interactive Power BI dashboard on 8,500+ grocery sales records to analyze sales performance by item type, fat content, and outlet type/size/location using DAX measures
- Designed KPI cards, donut charts, bar charts, and a trend line to visualize total sales, average rating, and outlet establishment trends, enabling slicer-based filtering for dynamic exploration
- Cleaned and transformed raw grocery data in Power Query, handling missing values and inconsistent categories to ensure accurate reporting

Rapido Ride Bookings Analysis Dashboard | *Power BI, DAX, Excel*

- Analyzed 100,000+ ride booking records in Power BI to track booking status, cancellations (by customer/driver), turnaround time (TAT), and booking value across vehicle types and locations
- Built DAX measures and interactive visuals to monitor success vs. cancellation rates, average ride distance by vehicle type, payment method distribution, and driver/customer ratings
- Cleaned and structured raw booking data by handling null values, incomplete ride reasons, and inconsistent fields to enable accurate KPI reporting and trend analysis

CERTIFICATIONS

- Google:** Google IT Support
- NPTEL:** Human Computer Interaction
- Microsoft:** Career Essentials in Data Analysis by Microsoft and LinkedIn

EXTRA CURRICULAR ACTIVITIES

Participated in Aarambh Cricket Tournament, AdvITYa Sports Fest
Member, AdvITYa (Inter University Techno-Cultural Festival)
Member, Event Management Team of Insights Club
